

# Lesson 26

## Communication Services

### Objectives:

- Categorize electronic communication
- Identify users of electronic communication
- Identify components of electronic communication
- Manage e-mail with Microsoft Outlook
- Send and receive e-mail
- Save a message

### Vocabulary:

- |                            |                     |
|----------------------------|---------------------|
| • Address Book             | • packet            |
| • archiving                | • save a message    |
| • attachment               | • signature         |
| • Contact Group            | • spam              |
| • e-mail address           | • text messaging    |
| • electronic mail (e-mail) | • user agent        |
| • instant messaging        | • Windows Live Mail |

### Categorizing Electronic Communication

- \_\_\_\_\_ mail can be sent to other people on a network at an organization or you can use an Internet service provider to send e-mail to any computer in the world.
- \_\_\_\_\_ messaging (IM) services send messages in real time.
- \_\_\_\_\_ messaging is using a cell phone or other mobile device to send and receive written messages.
- \_\_\_\_\_ over IP (VoIP) is used to make phone calls with an Internet connection instead of a regular telephone line.
- Online \_\_\_\_\_ allows you to conduct a conference with yourself and one or more other participants at different sites by using computer networks to transmit audio and video data.
- \_\_\_\_\_ rooms are Web sites that allow real-time communication so you can exchange messages with others through the computer.
- Social \_\_\_\_\_ sites provide a way to build online communities of people who share common interests or activities.

- \_\_\_\_\_ postings/comments are a type of personal journey created by one person or by a group.
- Message boards and \_\_\_\_\_ are services that provide bulletin board systems that serve as discussion sites; users can post messages asking for assistance.

### Identifying Users of Electronic Communication

- Millions of people use the Internet, and each is required to have unique \_\_\_\_\_ in the form of an e-mail address, sign-in or logon credentials, and password in the same way that each person has a unique \_\_\_\_\_ number.

### Identify Components of Electronic Communication

- Electronic communication is the technology that \_\_\_\_\_ computers to communicate with each other and other devices.
- In 1969, \_\_\_\_\_ was established and served as a testing ground for new networking technologies.
- ARPANET was a large wide area \_\_\_\_\_ created by the United States Defense Advanced Research Project Agency (ARPA).
- Today's \_\_\_\_\_ communication requires the following components:
  - Software
  - Sender
  - Receiver
  - Channel
  - Communication
  - Protocols
- Interpreting E-Mail Addresses:
  - An e-mail address consists of \_\_\_\_\_ parts:
    - The user name
    - The @ symbol
    - The user's domain name
    - Domain codes include .com, .edu, .gov, .mil, and .org.

### Parts of an E-Mail Message:

An e-mail message should contain \_\_\_\_\_ main components:

- The \_\_\_\_\_ of one or more people to whom you are sending the message
- A \_\_\_\_\_ line
- The \_\_\_\_\_ of the message
- \_\_\_\_\_ should be noted in the body of the message

### E-Mail Options:

- **Reply to Sender** sends the reply \_\_\_\_\_ with the original message.
- **Reply All** sends your message to \_\_\_\_\_ listed in the To or From line of the e-mail message.
- **Forward** sends a message to people \_\_\_\_\_ than those who sent the original message.
- **Courtesy copy** (Cc) and **blind copy** (Bcc) sends a copy of an e-mail to another person. The recipient of a Bcc is \_\_\_\_\_ visible to the other people receiving the message.

When you send someone an e-mail message, it is broken down into small chunks called \_\_\_\_\_ that travel independently from server to server to speed the process.

### Accessing E-Mail:

- Many \_\_\_\_\_ sites and Internet \_\_\_\_\_ providers offer e-mail as part of a monthly fee or even at no charge.
- Many people have cell \_\_\_\_\_ or handheld computers that can send and receive e-mail almost anywhere.

### Managing E-Mail with Microsoft Outlook

- \_\_\_\_\_ is a versatile application that you can use to organize appointments, tasks and to-do lists, addresses, and e-mail.
- Outlook is similar to Windows Live Mail, an \_\_\_\_\_ program provided free of charge from the Windows Live Web site.
- When you start Outlook, the default \_\_\_\_\_ window is the Outlook Today window.
- Using the Inbox, you can organize your mail by creating mail \_\_\_\_\_ for various topics, special projects, and individuals.
- You can \_\_\_\_\_ and delete folders and move or copy e-mail messages into folders.
- You can delete e-mail messages, \_\_\_\_\_ for messages within a folder, and sort messages by date.
- \_\_\_\_\_ is the process of backing up e-mail messages.

### Sending and Receiving E-Mail

- An advantage to using Outlook as your e-mail application is that as you create messages, you have easy \_\_\_\_\_ to the other Outlook features.

### Receiving E-Mail:

- When you \_\_\_\_\_ Outlook, it sends a request to your mail server to check if you have any messages \_\_\_\_\_. If you do, Outlook receives them and displays them in the Inbox folder.
- The message header tells you \_\_\_\_\_ sent the message, the \_\_\_\_\_ of the message. The Reading pane displays the actual text of the message.

### E-Mail Features:

- The Outlook \_\_\_\_\_ Book stores names, e-mail addresses, phone numbers, and other contact information so you can easily access it while you are sending and receiving e-mail messages.
- You can use a Contact Group to send the same e-mail to a \_\_\_\_\_.

### Sending E-Mail:

- Enter an e-mail address in the To text box.
- Include a subject.
- Enter the text.
- Click Send.
- Sending and Receiving E-Mail (continued)
- Receiving and Opening E-Mail Messages:
- Click the Send/Receive All Folders button in the Send/Receive group on the Home tab.

### Saving a Message

- You can save a message as a \_\_\_\_\_, a file in another format such as a text file, an HTML document, or a template using the Save As dialog box.
- Most people \_\_\_\_\_ to messages they receive and save important messages for future reference.
- You might want to delete unneeded messages and \_\_\_\_\_. Spam is unsolicited e-mail, essentially electronic junk mail.

### Replying to a Message:

- Select the message, click the \_\_\_\_\_ or Reply All button in the Respond group on the Home tab, type your response, and click Send.

### Formatting a Message:

- You can change the font type, font size, and text \_\_\_\_\_ of an e-mail message. You can also add bold, italic, and underline styles to text as well as center it and add bullets.

### Attaching a File to an E-Mail Message:

- Attachments are documents, \_\_\_\_\_, figures, and other files that you can attach to your e-mail messages.
- Click the Attach File button in the Include group on the Message window Ribbon, locate the file or document you want to attach in the \_\_\_\_\_ File dialog box, and then click the Insert button.

### Managing Attachments:

- When you receive an attachment, you can:
  - \_\_\_\_\_ it by clicking the attachment in the Message window to display the contents in the Reading pane
  - \_\_\_\_\_ the attachment by double-clicking it in the Message window
  - \_\_\_\_\_ the attachment by right-clicking it, clicking Save As on the shortcut menu
  - \_\_\_\_\_ the attachment by right-clicking it and clicking Remove Attachment on the shortcut menu

### Message Icons:

- Icons in the message \_\_\_\_\_ in the message list offer clues about each message.
  - A **sealed** \_\_\_\_\_ icon indicates a message that has been received but not read.
  - An **exclamation** point means the sender considers it an \_\_\_\_\_ or high-priority message.
  - A **paper clip** indicates that the message has an \_\_\_\_\_ file.
  - A **flag** icon is a reminder to \_\_\_\_\_ up.

### Copying to Multiple Recipients:

- You can insert \_\_\_\_\_ than one address in the To, Cc, and Bcc boxes to send to all the addresses at the same time.
- Each e-mail address should be \_\_\_\_\_ by a **semicolon**.

### Mail Configuration Options:

- You can configure Outlook to deal automatically with e-mail:
- \_\_\_\_\_ “out of the office” response replies to all e-mail messages when you are unable to reply yourself.
- \_\_\_\_\_ command automatically redirects your mail to another e-mail address

- \_\_\_\_\_ messages to your mobile phone
- \_\_\_\_\_ Senders List prevents messages from designated addresses from being placed in your Inbox
- \_\_\_\_\_ Senders/Safe Recipients List accepts all e-mails from the sender names contained in the list.
- A \_\_\_\_\_ consists of text or pictures that you create so Outlook can add it to the end of any outgoing messages

## Summary

In this lesson, you learned:

- Electronic communication includes e-mail, instant messages, text messages, VoIP phone calls, online conferences, chat rooms, blogs, and social networks.
- The components of electronic communication include software, a sender, a receiver, a channel, communication content, and protocols.
- Wireless communication makes it possible to send and receive e-mail using a handheld computer or cell phone with e-mail capabilities.
- E-mail addresses consist of three parts: the user name, the @ symbol, and the domain name.
- Microsoft Outlook includes features to manage appointments, tasks, and e-mail. The Outlook bar displays shortcuts that give you quick access to each of the Outlook folders.
- Electronic mail is similar to regular mail because it requires an address, a message, and a carrier to get it from the sender to the receiver.
- You can access e-mail on a computer using a program such as Microsoft Outlook, or you can send and receive e-mail messages using a Web site with a built-in e-mail program, such as Gmail or Hotmail.
- An e-mail message header includes the address of the recipient, the subject of the message, and information about to whom the message is sent as a copy.
- You can use the Inbox folder in Outlook to send and receive e-mail messages.
- An attachment is a file that is sent with an e-mail message and that can be opened by the recipient.
- You can reply to an e-mail message, forward a message to a new recipient, delete a message, or save a message.
- Spam, or junk e-mail, consists of unsolicited messages that take up space in your Inbox unnecessarily.
- E-mail messages are organized in folders of incoming messages, sent messages, deleted messages, and junk e-mail. You can also create additional folders to organize your own e-mail.
- Special e-mail features let you add an automatic signature to messages, block messages from certain addresses, create personalized stationery for your messages, set up an automatic response, or forward your messages to another address.
