

Name _____

Economics

Unit 4 – Supply, Demand, & the Role of Price

The Circular Flow of Economics & You

Assignment: Give examples of each element of the circular flow of economics in a mixed economy. This assignment is worth 50 points and will count as a Work grade.

Directions: On each arrow on the Circular Flow of Economics diagram below, write a specific example of what that arrow represents on the line labeled with the same number as the arrow. An example is shown on one pair of the arrows between the government and firms. **Do not simply re-write the circular flow diagram that was gone over in class. Do not use any example used in class.**
