

What Happens Inside Your Computer?

<http://library.thinkquest.org/C0115420/Cyber-club%20800x600/How%20it%20works/What%20Happens%20Inside%20Your%20Computer.htm>

1. What happens first?
2. What is the "boot program"?
3. What is the Power On test?
4. What is the CMOS and what purpose does it serve?
5. What is a bootstrap loader?
6. What are the six categories of tests that are performed?
7. What happens if you have a floppy in the drive?
[you will have to do some research to discover the answer to this].
